

METALWRAP

Reinforced woven & coated wrapping fabric for product protection

Features and Advantages

METALWRAP is a combination of the protective features of traditional HDPE/VCI coated HDPE and the speed and automation ability of stretch film.

- Poly based fabric coated with polyolefin/ polyethylene blend for greater durability, dust & moisture protection, and higher Burst Strength and tear resistance
- Secondary layer of woven material - for pack integrity and strength to prevent product damage during handling and storage
- Volatile Corrosion Inhibitor (VCI) coating - for corrosion protection
- High quality customized multi color printing on wider web for cost effective distinctive branding
- High strength reinforced coated woven packaging product in narrow web is designed for automatic coil wrapping machines
- Specialty construction – This customized capability allows you to better match your needs with unique product solution
- We can stitch and supply this product in any shape and size

METALWRAP

Reinforced woven & coated wrapping fabric for product protection

ITW Signode, a leading industrial packaging solutions provider has introduced METALWRAP, the superior and cost effective protective packaging solution as compared to the conventional stretch film

METALWRAP Range and Specifications

Product Name	Fabric Type (Tapes per 10cm)	Product Thickness (mm)	Product Weight (GSM)	Roll Length (Standard)
CobraWrap Plus EFR*	19x19	0.09	84.3 ± 5%	100 m
CobraWrap*	20x16	0.10	92.0 ± 5%	
EXTRA Plus	19x19	0.10	90.2 ± 5%	
SELECT Plus	19x19	0.10	95.2 ± 5%	
PREMIUM Plus	19x19	0.11	108.2 ± 5%	
ULTRA Plus	38x19	0.18	115.0 ± 5%	
HEAVY Plus	38x19	0.19	125.5 ± 5%	

Notes:

- * For use on Coil Master®.
- All other products are for manual applications.
- Specialty lengths from 300' (91.45m) to 12000' (3657.6m).
- Available in widths of 1.22m, 1.52m, 1.83m, 2.13m, 2.45m, 2.74m, 3.05m.

Optional Extras

- VCI protection layer depending on the application
- Six coating colors to highlight for better visibility & branding
- Lamination for oil absorption and static protection

Applications

- METALWRAP products are widely used for both auto & manual wrapping of coil strip, bar stock, coated wheel, coil covers, cold rolled ferrous and non-ferrous products, copper & brass, flat rolled ferrous and non-ferrous products, galvanized steel, painted steel, plate steel, steel tube, strip laminate, alloys, automotive aluminized sheet, tin coils, VCI paper & bags.
- Heavy gauge products can be wrapped with reduced corner protection or no corner protection this improves productivity of automatic in-line or off-line wrapping systems and manual wrapping stations.
- Strength films provide excellent fold characteristics leading to proper tucking during manual wrapping. This improves pack aesthetics and enhances brand image of the products packed.
- To illustrate infrequent film changeovers illustrate with a coil of certain dia and width of how long the roll will last with 20 - 30% overlap
